4,000 Jobseekers Tap Local and Overseas Opportunities at SM City Trece Martires

Around 4,000 jobseekers gathered at SM City Trece Martires for the Mega Job Fair organized by the PESO Trece Martires in partnership with the mall. The event featured local and overseas job opportunities, with participating employers and recruitment agencies conducting on-the-spot interviews and accepting applications across various industries.The strong turnout highlighted the continued demand for employment opportunities in the community. Through PESO Trece Martires and the local government, the job fair provided a venue for connecting jobseekers with employers and bringing employment opportunities closer to residents.

DENR calls to protect Cavite watersheds amid El Niño threat

TRECE MARTIRES CITY, Cavite (PIA) — The Department of Environment and Natural Resources (DENR) has called for the protection of watersheds which act as natural shields during dry spells.

Hernan Curod, Forester III at the DENR's Cavite Provincial Environment and Natural Resources Office (PENRO), emphasized the importance of healthy watersheds during periods of reduced rainfall.

"Alam natin na kapag kulang ang pag-ulan, ang puno po ay kailangan nating itanim para mapakapal o mapaganda ang ating watershed, pero may tamang management at pagpaplano ng pagtatanim."

DENR CALLS • 5

Cavite records fastest economic growth in CALABARZON at 6.7% in 2025

Cavite posted the fastest economic growth among the provinces in the CALABARZON region in 2025, expanding by 6.7 percent, according to the latest Provincial Product Accounts (PPA) released by the Philippine Statistics Authority (PSA).

The figure was presented during the Provincial Product Accounts Dissemination Forum held on October 6, 2026, at Elijah Hotel and Residences in the City of Dasmariñas, which brought together planning and development officers from various local government units, members of the Provincial Statistics Committee,

DOST-FNRI Trains Batanes Food Stakeholders on Sensory Evaluation to Boost Product Quality

Local food producers, researchers, academe representatives, government personnel, and other food industry stakeholders in Batanes gained practical knowledge in assessing food products through sensory evaluation during a training conducted by the Department of Science and Technology Provincial Science and Technology Office-Batanes (DOST PSTO-Batanes) and the DOST-Food and Nutrition Research Institute (DOST-FNRI) on October 2, 2026.

The training formed part of the 2026 Science, Technology and Innovation (STI) Caravan in Batanes and introduced participants to scientific methods for assessing food products based on consumer preferences and acceptability.

The activity was designed to help participants understand how sensory evaluation can be used in product development and improvement, particularly in identifying consumer responses to a product's sensory characteristics.

Frankie Lycurgus D. Avorque, a Professional Food Technologist and Certified Sensory Evaluator from DOST-FNRI, served as the resource speaker.

He discussed the fundamentals of sensory evaluation and its application in food product development, including the development of sensory panels and the proper conduct of sensory tests.

Participants learned about the recruitment, screening, and training of sensory panelists, as well as the requirements for conducting reliable sensory tests. These included preparing an appropriate testing environment and ensuring the proper preparation and presentation of food samples.

The training also included a hands-on session where participants applied the concepts through actual sensory testing.

Using the hedonic test, participants evaluated longganisa and two locally produced wine samples to determine their overall acceptability. They also compared juice samples based on consumer preference, giving participants direct experience in gathering sensory data that can be used to assess and improve food products.

The practical exercises demonstrated how sensory evaluation can provide producers with information on how consumers perceive their products and which characteristics may need to be improved before they are introduced or further developed for the market.

By combining technical discussions with actual food testing, the training provided local stakeholders with basic skills they can apply in developing products that better respond to consumer preferences.

The activity was part of the October 1 to 9, 2026 STI Caravan of DOST PSTO-Batanes, which brings science, technology, and innovation programs and services closer to communities across the province.

Through initiatives such as the sensory evaluation training, DOST continues to support Batanes food producers and other stakeholders in applying science-based approaches to product development, quality improvement, and market readiness. ***(Nelson Santos)***

DOST-SETUP

from page 8

300 percent increase in sales as the improved packaging coincided with the growth of tourism in Batanes.

The business also increased its workforce from three to five employees and eventually expanded into other ventures, including a hotel and restaurant.

Tawsen's product line grew to include locally produced wine, turmeric and ginger products, and wakay or sweet potato chips, creating additional market opportunities for agricultural products sourced from the province.

Building on the gains from its first intervention, Tawsen availed itself of DOST-SETUP Phase 2 in 2019 to pursue a larger expansion.

Lim envisioned a two-storey facility that would integrate food production and tourism. The ground floor was planned as a production area where visitors could observe the processing of Tawsen products, while the second floor was intended as a museum and showcase for locally produced goods from Batanes.

The expansion, however, was disrupted by the COVID-19 pandemic, which brought tourism to a standstill. Tawsen later faced another setback when a fire damaged the business.

The successive challenges prevented the enterprise from fully realizing its Phase 2 plans, while its recovery in the tourism market has remained a continuing challenge.

Despite these setbacks, Lim said DOST continued to support the enterprise instead of leaving it to deal with the difficulties on its own. Assistance included flexibility in payment arrangements, giving Tawsen additional time to address its obligations while working toward recovery.

"All-out pa rin ang support nila. Nagbibigay sila ng extension of payment. Hindi sila nagpabaya sa mga clients nila," Lim said.

For Lim, the experience highlighted another important aspect of DOST-SETUP: its role as a continuing partner of enterprises, particularly when businesses encounter circumstances beyond their control.

Tawsen Agri Ventures' experience illustrates the challenges faced by small enterprises in island communities, where tourism, market access, and other external conditions can significantly affect business operations. At the same time, its journey shows how technology upgrading and sustained institutional support can help enterprises build capacity and pursue recovery after major disruptions.

Despite the setbacks, Lim remains appreciative of the assistance that helped Tawsen improve its operations and develop new products using Batanes' local resources.

"SETUP has opened more opportunities for product development for us," he said.

For Tawsen Agri Ventures, the journey continues, with DOST-SETUP remaining a partner not only in business growth but also in rebuilding and moving forward after adversity.

The Future

from page 8

Previously held as a one-day conference, EdTek Con expands to two days this year through a collaboration with Hexcore Labs Philippines' Mission: LearnPossible 2, led by CEO Alan Reyes. The second day will feature student teams from leading universities competing in a Capture the Flag competition and an AI Hackathon, demonstrating how learners can turn knowledge into practical skills and tackle real-world challenges while advancing a more adaptive, innovative, and future-ready approach to education.

Established in 2025, EdTek Con was founded by EdFolio CEO Ursel Laureno to bring educators, education leaders, and technology innovators together in shaping the future of education and learning. The conference aims to amplify educator voices and connect them with technology leaders to address the evolving challenges and opportunities in today's rapidly changing education landscape.

Registration for EdTek Con is available through: https://edtekcon.helixpay.ph/

Registration for Mission: LearnPossible 2 competitions: https://tinyurl.com/Mission-LearnPossible-2

Scorched

from page 8

Customers can earn one stamp for every qualifying meal purchase and collect a total of 21 stamps to complete their stamp card. This includes seven Rice Meal stamps, seven Overload Meal stamps, and seven Groufie Meal stamps.

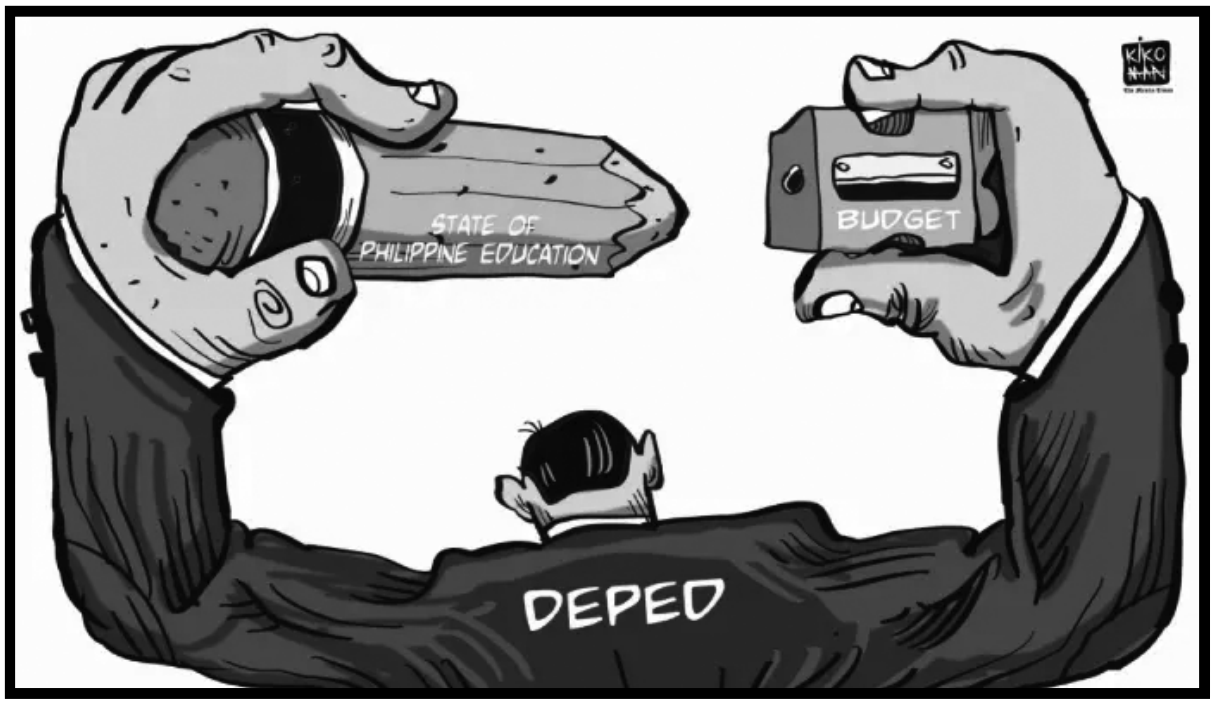

Customers who complete their stamp card will receive a free Scorched tumbler and an engraved voucher.

The promotion is available for both dine-in and takeout transactions, allowing customers to enjoy their favorite Scorched meals while collecting stamps toward exciting rewards.

With every qualifying purchase bringing them closer to completing their stamp card, customers can make their next meal at Scorched at SM City Tanza even more rewarding.

Editorial

Nursing as an economic engine

THERE is a growing recognition in the Philippines that rapid developments in technology, particularly areas affected by artificial intelligence (AI), are putting greater pressure on the country's labor market. Already, the skills gap has become critical; according to an analysis by the World Economic Forum last year, an estimated 68 percent of the Filipino workforce will need additional training by 2030 to remain viable, far above the 47-percent global average. As a consequence, much of the government's strategy toward job creation has been to focus on "upskilling" the workforce, and to update training for entry-level workers through platforms such as the Technical Education and Skills Development Authority (Tesda).

The government recognizes the rapidly evolving technological landscape created by the growth of generative AI and increasing digitalization, and most of its efforts toward upgrading the Filipino workforce are directed along those lines. However, this may be self-defeating.

AI and other forms of increasing automation, despite the wildly optimistic projections of unlimited jobs to result from developments such as the "Pax Silica" initiative and the tech-oriented Luzon Economic Corridor have only led to the reduction of human jobs, and will continue to do so. It is already happening; according to data last year from the International Trade Administration, the human share of work tasks in the Philippines is expected to decline from 43 percent currently to just 26 percent by 2030, while the share of job tasks done by completely nonhuman, automated technology will increase to 38 percent.

While upskilling the workforce through the standard and vocational education systems to stay in step with the march of technology is important and should be given structured attention by the government, making it the priority in policy management of workforce development is a focus on diminishing returns. The government should instead throw more of its supporting efforts toward "AI-proof" jobs that are substantial economic drivers, of which nursing is perhaps the most productive.

Data from the Asian Development Bank reveals just how profoundly effective the nursing profession is in supporting the national economy, and doing so in such a way that reaches down to the level of individual households. Globally, there are approximately 65 million healthcare workers of all types — which already represents a shortage of some 10 to 15 million — and almost half of those, about 29 million, are nurses. The nursing profession is one of the most job-creating economic sectors in existence (in stark contrast to the job-reducing tech sector), creating 3.4 jobs across related industries for each nursing job.

There is a large untapped potential for employment as well. According to World Bank data, across Asia and the Pacific, health employment accounts for only 4 to 7 percent of total jobs, compared with up to 20 percent in advanced economies. Nursing professionals here in the Philippines have estimated the need for new nurses at about 200,000 a year — taking into account those who would work here and those aiming for overseas employment — and emphasize that the shortage complicates the government's broader public health aims, such as the universal healthcare framework. Globally, the current shortage of nurses is estimated to be 5.8 million workers; with each nursing job returning about 10 times the initial investment — whether it comes from the government or individual families, not making nursing a top priority in skills and job development is, as the saying goes, leaving a lot of money on the table for the nation as a whole.

Another benefit of nursing is that it provides a? great deal of formal job and career opportunity for women, although the work itself is gender-neutral. About 70 percent of all healthcare jobs worldwide and 85 percent of nursing jobs are held by women. While there are still income equalities, using nursing as part of a formula to close the employment gap between men and women could increase gross domestic product by as much as 35 percent, according to an analysis by the International Monetary Fund.

Finally, nursing is one of the very few professions for remittance-dependent countries like the Philippines, where overseas and domestic work actually complement each other. Nurses who work overseas and then return, which is the career path for a significant majority of them, bring with them a great deal of knowledge transfer, as well as their economic contribution, and are able to help improve the domestic health system.

Sakit na Leukemia, Alamin!

Nagulat ang lahat sa pagkasakit ni Francis M. sa sakit na Acute Leukemia. Ano ba itong sakit? Paano ba ito nakukuha at maiiwasan?

Ang leukemia ay isang kanser sa dugo. Nagbabago ang cells (selula) sa dugo ng pasyente at nagiging kanser ito. At dahil dumadami ang cancer cells, natatabunan ang mga normal cells natin, tulad ng red blood cell (pulang dugo) at platelets.

Ang sintomas ng leukemia ay dala ng pagkasira nitong 2 klaseng selula: (1) Kumokonti ang red blood cells. Nagiging anemic ang pasyente at kailangan salinan ng dugo; (2) Kumokonti ang platelets. Ang trabaho ng platelets ay ang pagbuo ng dugo kapag tayo'y nasusugatan. Kapag nagkulang ng platelets, puwede tayong duguin sa ilong, gilagid at balat. Ganito ang nangyari kay Francis M.

Kapag ika'y madalas magkaroon ng pagdurugo o pagpapasa, ipasuri ang iyong dugo: CBC with peripheral smear. Sa ganitong blood test, matutuklasan kung may leukemia ang pasyente.

Ano ang sanhi ng leukemia? Apat ang posibleng pinanggagalingan ng leukemia:

1.Genetics - Namamana ito sa ating magulang.

2.Radiation – Masama ang laging exposed sa mga X-rays, CT Scan, MRI at iba pang radiation.

3.Chemicals – Masama ang mga ginagamit nating pesticides para sa halaman. Gumamit ng mask at guwantes. Ang benzene, isang kemikal ng plastic, ay puwede ding magdulot ng leukemia.

4.Smoking – Masama ang paninigarilyo. Itigil iyan.

Ang leukemia ay ginagamot sa pamamagitan ng chemotherapy, bone marrow transplant at makabagong stem cell treatment. Mahal ang mga pamamaraan na ito at hindi pa tiyak na gagaling ang pasyente. Kailangan ipasuri ang leukemia sa mga ekspertong doktor, na kung tawagin ay Hematologists.

Paano tayo iiwas sa leukemia? Sundin po ang mga payong ito:

* Ang mga bata (edad 2 pababa) ay dapat pakainin ng saging at orange 4 hanggang 5 beses bawat linggo. Sa ganitong paraan, makaiiwas ang mga bata sa leukemia.

* Turuan din ang mga bata na kumain ng gulay, tulad ng pechay, kangkong at ampalaya.

* Umiwas sa hotdog, tocino, langonisa at hamburger. Ayon sa pagsusuri, ang mga preserved meats ay puwedeng magdulot ng leukemia.

* Hugasan maigi ang gulay at prutas bago kainin. Siguraduhing walang kemikal (tulad ng fertilizer) na nakadikit dito.

* Piliin ang mga organic na manok at itlog. Ang ibig sabihin ng "organic" ay hindi gumagamit ng kemikal sa pagpapalaki ng manok at iba pang pagkain. Mabuhay ng malinis at umiwas tayo sa sakit.

DENR calls

from page 1

Prolonged dry spells caused by El Niño lead to a significant drop in water levels. During these times, watersheds act as temporary water reservoirs that filter pollutants as the water flows downstream.

"Ang mga watershed ay nagsisilbing pansamantalang imbakan ng tubig bago dumaloy sa mga sapa at iba pang daluyang tubig. Nagsisilbi itong filtration system at pinapanatili ang kalidad ng tubig kung saan nasasala na 'yung mga basuri o dumi bago dumaloy sa ating kapaligiran."

However, land use changes and increased human activities have negatively affected forest and agricultural areas over the years and threatened watershed health. Curod acknowledged that rapid urbanization in developing provinces such as Cavite has become a reality.

To safeguard the province's remaining watersheds, Curod suggested regulating tourism, especially in protected areas, to minimize human activities that can sometimes lead to hazards like forest fires.

"Pagbabawas ng tourism activities: sa probinsya ng Cavite, mayroong isang protected area ang DENR. Kung mataas po ang hiking activities, mataas rin po ang potensyal na magkaroon ng human-induced fire."

The DENR manages the Mt. Palay-Palay-Mataas na Gulod Protected Landscape, which covers Ternate and Maragondon. Curod highlighted that these areas are among the most vulnerable during prolonged dry seasons.

"Mas bumababa ang water level sa ating lugar. Tumataas ang incident ng forest fire and grass fire. Mahalaga po ang pangangalaga natin sa ating mga kagubatan at watershed o tubig-kanlungan upang ma-supply-an natin ng sapat na tubig 'yung mababang area."

Poor water consumption further worsens the severe dry conditions caused by the El Niño—a challenge severely felt in highly populated and industrialized areas.

"Ang sobrang paggamit ng tubig lalo sa panahon ng El Niño ay isang malaking suliranin hindi lang ng probinsya ng Cavite kundi sa buong bansa. Kung mababa o mali ang paggamit ng tubig, ibang malaking problema ito."

Although El Niño is a naturally occurring phenomenon, the DENR continues to urge local government units and national government agencies to implement proactive measures to cushion its human impact.

"Sa panahon ng El Niño, importante po ang monitoring and patuloy po na prevention measures na ginagawa ng lahat ng stakeholders kabilang ang local and national government." ***(PB-PIA Cavite, with reports from Cavite PDRRMO)***

Cavite records

from page 1

representatives of national government agencies, private companies, and media partners.

The province's 2025 growth rate increased from 5.2 percent in 2024, with its Gross Domestic Product (GDP) reaching an estimated PhP 875.67 billion, up from PhP 820.76 billion in 2024 and PhP 779.91 billion in 2023, at constant 2018 prices.

During the forum, Ms. Charito C. Armonia, Regional Director of the Philippine Statistics Authority – Regional Statistical Services Office IV-A (PSA-RSSO IV-A) CALABARZON, was present to lend her support to the dissemination of the latest Provincial Product Accounts (PPA) results. Her presence underscored the PSA's commitment to strengthening the dissemination and use of reliable, timely, and relevant economic statistics as a basis for development planning and policy formulation across the region.

Meanwhile, Mr. Claire Dennis S. Mapa, PhD, National Statistician and Civil Registrar General of the Philippine Statistics Authority (PSA), delivered a video message to the participants. In his message, he emphasized the importance of the PPA in providing stakeholders with comprehensive and reliable information on the economic performance of provinces. The data serve as an important reference for local government units, national government agencies, the private sector, and other stakeholders in assessing economic trends, identifying development priorities, and formulating evidence-based plans and programs.

His message also highlighted the value of collaboration among statistical agencies, local governments, and other stakeholders in ensuring that official statistics are effectively communicated, understood, and utilized in advancing local and regional development.

Ms. Raquel C. Ronario, Supervising Statistical Specialist and Officer-in-Charge of PSA-Cavite, presented the province's 2025 Economic Performance, highlighting the growth of various industries that contributed to the province's economic expansion.

Among the industries, human health and social work activities posted the highest growth at 15.5 percent. This was followed by public administration and defense; compulsory social security at 10.5 percent, and other services at 8.7 percent.

The PSA also reported that Cavite's per capita GDP reached PhP 181,561 in 2025, representing a 4.6-percent increase from the previous year.

Also featured during the forum were presentations on development plans and initiatives of participating agencies. Mr. Michael R. Lavadia of the Department of Economy, Planning and Development (DEPDev) and Engr. EnP Lorna R. Leyran, Provincial Planning and Development Coordinator presented their respective agencies' plans, programs, and development initiatives.

The dissemination forum provided a venue for government planners, development stakeholders, private sector representatives, and media partners to gain a clearer understanding of Cavite's latest economic performance and use the data in planning, policy development, program implementation, and investment-related initiatives.

The latest PPA figures underscore Cavite's continued economic expansion, with broad-based growth recorded across key sectors of the provincial economy. ***—OPIO***

Pope Leo XIV delivers the Angelus prayer from the window of the apostolic palace overlooking St Peter's Square at the Vatican, on October 11, 2026. VATICAN MEDIA

CBCP head urges prayers for pope ahead of lung surgery

MANILA — The head of the Philippine bishops' conference on Monday urged Catholics nationwide to offer Masses, pray the rosary and perform acts of charity for Pope Leo XIV ahead of surgery to remove a lung nodule.

Archbishop Gilbert Garcera, president of the Catholic Bishops' Conference of the Philippines, called on bishops, priests, religious communities and families to pray for the pope's successful operation and full recovery.

"I appeal to our Filipino Catholic faithful to unite in prayer for our Holy Father, Pope Leo XIV, as he prepares to undergo lung surgery," Garcera said.

He urged bishops and priests to offer Masses for the pope's recovery and encouraged religious communities and families to pray the rosary.

Garcera also asked Catholics to offer their daily sacrifices and perform acts of charity, extending the appeal beyond formal prayers and church services.

"Let us pray that the Lord may guide his surgeons and all who care for him, sustain him with strength and peace, and restore him to health," he said.

Leo announced his upcoming surgery during the Angelus prayer at the Vatican on Sunday, Oct. 11, saying doctors had discovered a well-defined nodule in one of his lungs during recent medical examinations.

The pope said the nodule was detected "at a very early stage and was well localized," adding that doctors had recommended its removal and that he had decided to follow their advice.

"The doctors believe it is advisable to operate. I have decided to undergo surgery to remove it, following their advice," he said.

"The operation has already been scheduled for the coming days. I thank you for your spiritual closeness and entrust myself to your prayers," the pope added.

According to Matteo Bruni, director of the Holy See Press Office, the operation was scheduled early this week, with the pope expected to remain hospitalized for about a week at Rome's Gemelli Hospital.

Bishops warn green energy shift must respect indigenous rights

MANILA — Catholic bishops have warned that the shift to cleaner energy must not come at the expense of indigenous communities, their ancestral lands and the environment.

Bishop Moises Cuevas of Calapan, chairperson of the CBCP Episcopal Commission on Indigenous Peoples (ECIP), and Bishop Prudencio Andaya Jr. of Cabanatuan said the growing demand for critical minerals must not justify displacement, environmental destruction or violations of indigenous peoples' rights.

"A greener future cannot be built upon injustice," the bishops said in a joint statement for the national celebration of Indigenous Peoples Sunday on Oct. 11.

They called for genuine free, prior and informed consent, environmental protection and meaningful participation by indigenous communities in decisions affecting their lands and livelihoods.

The bishops warned of threats from extractive industries, large-scale infrastructure, fossil fuel expansion and climate change, saying indigenous communities often bear the brunt of environmental damage, flooding and drought.

They urged government agencies to protect ancestral domains, enforce environmental safeguards and ensure accountability in development projects.

The statement highlighted the Aeta community in Sitio Bacao, Palayan City, Nueva Ecija, whose members were displaced by the 1991 eruption of Mount Pinatubo.

With Church support, the community rebuilt its life through reforestation, communal gardens and livelihood projects, helping restore the environment, the bishops said.

"Indigenous peoples are not merely beneficiaries of assistance but partners, bearers of cultural wisdom, and active agents in shaping their future," they said.

The bishops also raised concerns about discrimination, loss of livelihoods, threats to cultural identity and inadequate implementation of existing protections for indigenous communities.

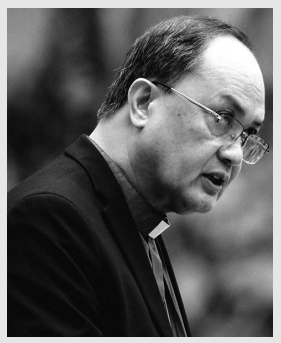

They called on civil society and the public to support community-led initiatives and defend indigenous rights, stressing that environmental protection must go hand in hand with social justice.

The national celebration, led by the ECIP and the Diocese of Cabanatuan, concluded with the planting of indigenous and endemic trees near the Bacao Mission.

The bishops said the Church's commitment must extend beyond the annual observance through sustained support and concrete action to protect indigenous communities and their ancestral lands.

At Vatican, Filipino cardinal says struggling families need community, not just advice

VATICAN — A Filipino cardinal urged the Catholic Church on Monday to support families struggling with poverty, violence and addiction, saying they need community support rather than judgment.

Cardinal Pablo Virgilio David of Kalookan cited families devastated by killings during the Philippine drug war, leaving widows, orphans and grandparents struggling to rebuild their lives.

"A fragile family needs more than pastoral advice. It needs a community that can help carry what it can no longer carry alone," David told participants of a Vatican meeting on the family convened by Pope Leo XIV.

Speaking at the Paul VI Hall, David said poverty, migration, addiction, violence and insecure work can make it difficult for families to meet Christian ideals.

He recalled a priest who initially questioned why children remained on the streets late at night, only to learn that some parents worked long hours to feed their families.

David also recounted the case of a father raising four children, ages 3 to 12, after separating from his partner. When the father was killed, relatives had to take responsibility for the children.

Many drug-war killings occurred in poor communities within his diocese, David said. Some families feared mourning publicly because their association with suspected drug users could expose them to suspicion.

In response, the diocese established neighborhood mission stations in communities that traditional parish structures struggled to reach. Priests, religious and lay missionaries visited homes, listened to residents and prayed with grieving families.

Widows began supporting other widows, while recovering addicts helped one another. Some people who initially received assistance later became pastoral leaders, accompanying other struggling families.

"Accompaniment then is not merely what a priest or a pastoral worker does for the family. It is what the Christian community gradually learns to become around that family," David said.

The experience challenged the Church to stop asking why struggling families did not attend Mass and instead examine whether it was willing to reach them, he said.

Some poor Catholics felt excluded from parish life because they lacked money, education, proper clothing or social standing, despite identifying themselves as Catholic, David added.

He said the approach reflects Amoris Laetitia, Pope Francis' 2016 apostolic exhortation on family love, which calls for pastoral accompaniment of families facing complex situations.

The Church must recognize families' struggles without abandoning Christian ideals, accompanying them through gradual growth rather than judging them by rigid classifications, David said.

"The Church cannot always wait for people to come to her," he said. "Sometimes she has to go where people live, where they struggle, where they grieve, where they hope and discover that Christ is already there waiting for us."

MAGLIBANG TAYO

KAPALARAN

ARIES (Mar. 21-Apr. 19) - Pansinin mo ang mabilis na agos ng tubig. Tularan mo ito sa pamamagitan ng pagpapabilis ng iyong mga kilos upang bumaha pa ng magagandang bagay ang iyong buhay. Masuwerteng kulay-pink. Tips sa lotto-4-16-21-24-30-42.

TAURUS (Apr. 20-May 20) - Magtutuluy-tuloy ang pagganda ng takbo ng kapalaran mo, lalo na kung isasabuhay mo ang mga natutunan mo mula sa karanasan ng iba. Masuwerteng kulay-beige. Tips sa lotto-6-15-22-26-35-40.

GEMINI (May 21-June 20) - Magbawas ka. Oo, ibigay mo sa iba ang ilan sa mga bagay na hawak mo. Kapag magaan ang iyong dinadala, mas mabilis kang uunlad at mas magiging maligaya. Masuwerteng kulay-blue. Tips sa lotto-7-13-20-25-36-45.

CANCER (June 21-July 22) - Minsan sa buhay ng tao, napakikinabangan din ang takot. Masuwerteng kulay-black. Tips sa lotto-2-11-26-29-32-43.

LEO (July 23-Aug. 22) - Sa panahong ito ng iyong buhay, lakasan mo lang ang iyong loob para lumakas din ang iyong suwerte at magandang kapalaran. Masuwerteng kulay-violet. Tips sa lotto-7-16-25-31-37-40.

VIRGO (Aug. 23-Sept. 22) - Ngayon na ang pagkakataon mo upang tumulong sa mga nangangailangan. Masuwerteng kulay-peach. Tips sa lotto-5-14-23-30-39-45.

LIBRA (Sept. 23-Oct. 22) - Hindi mo dapat pagkaitan ang iyong sarili. Ito ang mensahe ng iyong kapalaran. Masuwerteng kulay-red. Tips sa lotto-3-18-27-33-36-42.

SCORPIO (Oct. 23-Nov. 21) - Napapahamak ang mga hindi nakikinig sa babala. Kaya huwag mong balewalain ang mga babala. Mag-ingat ka dahil ang mga nag-iingat ay nakakaiwas sa sakuna. Masuwerteng kulay-aquamarine. Tips sa lotto-9-15-24-28-37-44.

SAGITTARIUS (Nov. 22-Dec. 21) - Kapag sama-sama, lumalakas ang mga tao. Kapag magkakasama, mas tumatalas ang pag-iisip nila. Hindi puwedeng mag-isa ka lamang, lalo na sa panahon ngayon. Masuwerteng kulay-white. Tips sa lotto-6-14-21-26-36-41.

CAPRICORN (Dec. 22-Jan. 19) - Makibahagi ka sa mga gawaing naglalayong tumulong sa mga nangangailangan at sa kapwa. Ngayon ay pinagmamasdan ng langit ang mga tao at pinagpapala ang mga may mabuting kalooban. Masuwerteng kulay-green. Tips sa lotto-3-12-27-29-35-40.

AQUARIUS (Jan. 20-Feb. 18) - Init ang kailangan kapag giniginaw, at init din ang kailangan kapag nanlalamig. Kapag kumilos ka nang kumilos, iinit ang iyong katawan at magtutuluy-tuloy ang iyong sigla. Masuwerteng kulay-yellow. Tips sa lotto-1-16-25-28-34-45.

PISCES (Feb. 19-Mar. 20) - Pagsama-samahin mo muna ang iyong mga katangian bago ka kumilos. Makakaasa ka na darating ang malaking pagbaha ng magagandang kapalaran sa iyong buhay. Masuwerteng kulay-purple. Tips sa lotto-8-17-22-26-30-32.

HOW TO PLAY: Sudoku puzzle is made up of a 9-by-9 grid with nine 3-by-3 sub-grids called boxes. There are 9 rows, 9 columns and 9 boxes in every puzzle.The object of the game is to fill all squares in the grid with the correct number.

The rules are:• Every row, column and box must contain all the digits 1 to 9.

• Each number can only appear once in every row, column or box.

• Every puzzle has only one correct solution!

Did You Know?

ONLY A QUARTER OF THE SAHARA DESERT IS SANDY

Most of it is covered in gravel, though it also contains mountains and oases. And here's another geography fact about the Sahara that everyone gets wrong: It isn't the world's largest desert—Antarctica is.

The Future is Now! EdTek Con 2026

As artificial intelligence and emerging technologies reshape how education is delivered, EdTek Con 2026 brings together educators, education leaders, policymakers, and technology innovators on October 15–16, 2026, at Thames International School Inc., Quezon City, to explore how schools and education systems can lead in an era of intelligent learning.

This year, EdTek Con takes on a timely and vital role through its theme, "The Future is Now: Educational Leadership in the Age of Intelligent Learning." More than a conference, EdTek Con serves as a collaborative platform for leaders and innovators from the education, education technology, and government sectors to examine how intelligent technologies are reshaping teaching, learning, and educational leadership. Across two days, participants will share emerging practices, insights, and opportunities for meaningful transformation. EdTek Con envisions a future where technology and human ingenuity create more adaptive, connected, and impactful learning experiences, with education leaders shaping that future today.

DOST-SETUP Support Helps Tawsen Agri Ventures Navigate Growth, Crisis and Recovery

DOST's Small Enterprise Technology Upgrading Program (DOST-SETUP) has helped Tawsen Agri Ventures improve its products, expand its operations, and navigate major setbacks brought by the COVID-19 pandemic and a fire that disrupted its planned expansion.

For owner Dennis I. Lim, the program's support went beyond the provision of equipment, extending to continued assistance as the business worked through financial and operational difficulties.

Established in 2005, Tawsen Agri Ventures initially operated as a printing and packaging enterprise before expanding into food processing and developing products using locally sourced resources from Batanes.

In 2014, Tawsen availed itself of its first DOST-SETUP assistance, acquiring printing equipment that allowed the business to produce tarpaulins, product labels, and packaging materials for its processed food products.

Lim said the intervention improved the presentation and marketability of Tawsen's products, contributing to an estimated 200 to
